I am a product engineer that solves technical problems without losing sight of why the product exists. I have two years experience working with JavaScript, building internal tools and working on digital products across the FinTech and Education Spaces. I have developed software solutions for business use cases from conceptualization to deployment.

EXPERIENCE

Decagon, Lagos — *Full stack Software Engineer*

October 2021 - PRESENT

- Working on Client Projects and Building Internal tools primarily with TypeScript and the MERN Stack.
- Serving as a Technical Instructor for Beginner Node.js Engineers.
- Recent projects I've been involved in include converting an application built with JavaScript to TypeScript.
- A member of a team that developed a web based Crypto Bank and wallet application.
- Built useable react components and styled with Tailwind.
- Managed state and HTTP requests with Axios and Redux.
- Experience writing unit and integration test.
- Exposure to agile methodologies.
- Built projects with Nodejs, React.js and JavaScript.
- Handled Database Management System with SQL like MySQL, Postgres, or NoSQL databases like MongoDB.
- Experience writing unit and integration test.

CleanAce, Lagos — Customer Relationship Manager

JUNE 2021- NOVEMBER 2021

- Implement customer analysis to identify trends and opportunities to generate revenue
- Manage customer service and support teams to address customer complaints relating to products and services
- Use social media to engage with customers
- Collaborate with marketing teams to personalize marketing interactions.
